DETAILED ACTION

Receipt is acknowledged of the request for continued examination filed 09/29/2008.

Information Disclosure Statement

Applicant's remarks concerning the IDS filed 03/2003 have been noted. A review of the file finds that the original IDS contained the cover letter, but no attached PTOL-1449 (a least in the scanned version). The resubmitted version of 07/2007 can not be converted to a PDF file by the system since it is not an IDS filing per se, but instead attached to the remarks. For some reason, this system does not recognize it for PDF conversion. Applicant is requested to resubmit the IDS including the cover letter with a copy of the filing receipt so that the references may be considered. This examiner apologizes for the inconvenience.

The following rejection is maintained in this action:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 6, 8-12, 15 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims now set out a second region comprising "a polymer and a substance having a melting point within the range between about 32 C and 40 C". However, the specification at page 13, lines 20-21, the specification sets out that the second phase can include a material which can be a monomer, oligomer or polymer. Therefore this substance may actually be a polymer forming a copolymer blend or the polymer itself, the polymer itself may have this property without need of another material added. If the polymer does not meet this limitation, then the other material may be added. However, at no time does the specification require BOTH the polymer and addition material. Therefore, the newly added limitation setting out the polymer AND substance is considered new matter.

Response to Arguments

Applicant's arguments filed 09/29/2008 have been fully considered but they are not persuasive.

Applicant argues that there is sufficient support in the specification and that these limitations were part of the original claims. As such, applicant is requested to amend the

specification in order to make it commensurate with the claim limitations. This amendment will then make the rejection moot. A supplemental search will be done at that time. The rejection is maintained until the amendment is made to the specification.

Conclusion

This is a continuation of applicant's earlier Application No. 10/619727. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
